It's here! *fioptics* is in your neighborhood.

Hawaiian Telcom has brought fiber fast speeds to your community. In fact, we're the only broadband provider in Hawaii who can deliver fiber all the way to your door. Other companies use copper wire (the same as your old phone line) for the final connection to your home.

Say hello to a more reliable and secure connection.

With our Fioptics network, you can...

- Load and surf websites faster
- Download big files in seconds
- Stream shows on multiple devices

- Play video games without the lag
- Enjoy video calls without the buffering
